📍 Krakow, Poland

I'm a Staff UX Designer at Google in Kraków, fascinated by how people will live and work alongside autonomous technology. My work is the shift from operating digital tools to collaborating with AI agents: what people see before an agent acts, how they stay in control, how they step in when it gets stuck, and how trust is earned over time. Product design, to me, is a strategic ecosystem where technical complexity becomes human agency.

EXPERIENCE - 12+ years

Staff UX designer

Google, Poland.

Jan 2025 - present

- Interaction frameworks for AI-assisted experiences: Design how people and AI agents work together on the web, with trust, consent and control at the centre.
- Quiet signals, easy resumption: Low-friction ways to pick a task back up. Co-author of the web.dev guide to agent-friendly websites; contributor to the open-source WebMCP extension.

Senior UX designer

Fortum Oyj, Finland.

Jan 2023 - Jan 2025

- Design lead for one app across Sweden, Finland and Norway, from research to MVP, on a shared design system.
- Raised Fortum and NorgesEnergi app ratings by about 50% and improved satisfaction by aligning user needs with business goals. Set benchmarks for Fortum's smart services and led cross-functional teams.

Chief designer - UX and concepts

Kemppi Oy, Finland.

Apr 2016 - Jan 2023

- Led digital initiatives in welding products: a 20% revenue increase with little churn.
- Red Dot design awards for MasterTig and Flexlite TX (2020) and Master M (2023). Cylinder-lifting patents.

Co-founder

Pixelbay Oy, Finland.

Dec 2020 - Jan 2025

- Gaming technology company: strategy, product and execution, on the belief that human connection, not just the product, drives business success.

Earlier roles

Product designer

TATA ELXSI, India.

Jun 2014 - Mar 2016

Intern - Product design

Godrej, India.

Jun 2013 - Dec 2013
